- Workshops featuring problem based learning and small group work
- Specialised introductory modules for lawyers (Introduction to the Construction Process) and Construction Professionals (Introduction to the principles of the law of contract)
- Practical focus with the teaching faculty featuring experienced practitioners from leading law firms and industry experts.

Topics include:

- Construction procurement & the tendering process
- Standard form contracts
- Construction Contracts Act 2013
- Consultant appointments and designer duties
- Collateral warranties and bonds
- Contract administration
- Construction regulation
- Liability provisions and insurance provisions
- Dispute resolution mechanisms
- Adjudication
- Allocation of risk

Who should attend?

This course is suitable for solicitors currently working in the area or for those who would be interested in practicing in this area. It will also appeal to dispute resolution solicitors and barristers looking to broaden their understanding of area of law that generates a large amount of claims and litigation. The course will also be of interest to experienced construction professionals including engineers, claims surveyors and expert witnesses.
